

2022 NICT SUMMIT PLATINUM PLUS SPONSORS

Financial company helping connect wholesale investors to global opportunities. Established in 2018, Beltap Capital is a boutique merchant bank and business advisor.

BELTAP Capital help young, growing businesses to access new sources of funding and to properly prepare for any transactions they are planning to undertake, while providing advisory services on their operations.

Through Beltap's Fund Raising Services, it offers deal structuring, refinancing and debt advisory support. Navigating the fund-raising market can be incredibly challenging, particularly for those who are relatively new to it. Small start-up businesses and even experienced entrepreneurs can struggle to attract the interest of established banks and other capital-raising institutions, many of whom will not engage with "small" deals. Filling that gap, supporting young and growing businesses at a vital stage of their development, is precisely why Beltap Capital was created. Through business advisory services, the company provides a full back to middle office suite of personnel that provide businesses with a strong support platform to scale efficiently. Its services may include operational effectiveness, business process improvement and sales and marketing support. **Visit URL:** <https://beltapcapital.co.uk/>

Land Registration Systems, Inc. (LARES) is the organization tasked to implement, fund, and deliver the nationwide implementation of the Philippines' major modernization project on land registration: the Land Titling Computerization Project (LTCP) of the Land Registration Authority (LRA). Implemented under a Build-Own-Operate (BOC) arrangement as provided for in the Build-Own Transfer (BOT) law.

The LTCP is a major information technology project of the Philippine government to secure land ownership and restore the integrity of land titling and deeds registration in the country. To forward with this mission, the project involves a myriad of modern reforms and solutions such as the development of customized application systems, supply of IT products and services, extensive training of end users, conversion of titles and documents to digital form, a nationwide network interconnection and the construction of IT-enabled government offices. **Visit URL:** <http://www.ilttechnologies.com/lares.html>

Maya's frictionless experience has changed the game for banking and payments. Through the all-in-one Maya app, customers can efficiently manage their finances and build their funds through their savings accounts and can quickly move money to e-wallet whenever needed to make a transaction and buy or sell crypto.

Propelling Maya's growth are innovative executions of digital banking features. Most recently, Maya introduced a daily interest crediting for Maya Save, allowing bank customers to see earnings reflected daily instead of monthly. Pioneered mission-led rewards to encourage bank customers to use digital for everyday transactions. Maya Savings offers a customized money management experience through its Personal Goals feature users can save in up to five different 'wallets' catering to specific goals. Maya also made bank account opening easier. Upgraded Maya wallet users can easily open a savings account without maintaining a minimum balance.

With its rich pool of ready transactional data, Maya is the only digital bank to offer credit products to consumers and small businesses within the first quarter of its launch. Eligible customers can enjoy Maya Credit, an instant revolving line of credit of up to PHP15,000. **Visit URL:** <https://www.itpi.com.ph/home>
